SUMMARY

I'm a developer skilled in JavaScript, TypeScript, React, Node.js, and PostgreSQL, focused on building efficient web applications. Currently exploring DevOps with Docker and Kubernetes, I thrive on solving challenges and creating impactful solutions.

EXPERIENCE

SevginWeb, **FullStack Developer**

Jan 2023 - Present

Revamped the payment process using modern design and functionality, improving user satisfaction and increasing the conversion rate by ~15% in the first few months post-deployment. Optimize the CI/CD pipeline of the application for a reliable deployment. Delivered a comprehensive notification service by implementing frontend and backend components, streamlining user communication and system alerts.

Accenture, **FullStack Developer Intern**

May 2022 - Nov2022

Researched and engineered microservices using Golang, Python, and React, ensuring scalable and efficient system performance. Deployed microservices on GCP via Azure Pipeline, leveraging Docker and Kubernetes to enable seamless and reliable operations. Enhanced user experience by redesigning the dashboard, improving the logical flow and intuitive presentation of information.

SevginWeb, **Part-time Full Stack Developer**

Aug 2021 - Dec 2022

Developed SEO-focused blogs using Next.js and headless WordPress, boosting the click-through rate to the main site by ~20% within four months. Implemented a Geo-detection feature with Cloudflare Workers, reducing the bounce rate and improving user engagement over time.

Code.Rehab, **FullStack Developer Intern**

Feb 2021 - Jul 2021

Developed Front-end using React and GraphQL. Created microservices with Nodejs using AWS serverless for an online magazine platform. Implemented CI/CD pipeline between Jira and AWS.

EDUCATION

SAXION UNIVERSITY OF APPLIED SCIENCE

B.A. in Software Engineering - 2022

SKILLS

JAVASCRIPT • HTML • CSS • SASS • REACT • NEXTJS • VUEJS • MATERIAL UI • TAILWIND CSS • NODE.JS

SIDE PROJECTS

CI/CD Pipeline Project

Designed and implemented a multi-cloud CI/CD pipeline using Azure DevOps to build, containerize, and deploy a production Next.js application with Docker to Google Cloud Artifact Registry and Kubernetes (GKE), with cloud resources provisioned using Terraform.

Provisioned and operated infrastructure and self-hosted CI agents via Terraform, implementing secure service-account authentication, Docker cache and storage optimization, and automated cleanup to ensure reliable, scalable deployments.

Managed Public Cloud

2023 - Present

Managed a public cloud infrastructure using OpenStack, hosting approximately 10 WordPress websites and counting and a self-hosted n8n automation system.

Gained hands-on experience with Linux and cloud infrastructure-as-a-service, enhancing system management and troubleshooting skills. Ensured reliable performance and uptime for hosted services
